

“AS RESTAURANTS
REOPEN, SEATING MOVES
OUTDOORS”

NEW YORK TIMES, 16 JUNE

MAXIMIZE YOUR PROFITS WHILE ADHERING TO THE LATEST COVID GUIDELINES WITH BROMIC SMART-HEAT™ PATIO HEATERS

- » Covers twice the area of standard portable heaters - lower cost of operation means less propane to heat your patio!
- » **8 hours of operating time** on a single tank of propane
- » Up to 215ft² heating area
- » Higher wind resistance than standard patio heaters - guaranteeing warmth and comfort to your patrons!
- » Can be converted to run on natural gas with the Bromic Tungsten portable conversion kit
- » Portable and easy to maneuver - heat is provided where you need it!

**TUNGSTEN SMART-HEAT™
PORTABLE GAS HEATERS**

TUNGSTEN SMART-HEAT PORTABLE VS TRADITIONAL MUSHROOM HEATER

Long wave
Indirect, non-directional heat
Up to 75ft² heating area
Outdated convection heater
Inefficient heating
75% vertical heat loss
Unbalanced structure
Generic design

Short and medium wave
Direct and directional heat
Up to 215ft²² heating area
True infrared radiant heat
Higher heat output
Efficient directional heat
Stable weighted Base
Award-winning design

Non-Directional heat pushes the warmth evenly in all directions.

Directional heat implies that the majority of the heat produced is pushed in one direction, allowing for better heat coverage.
